

RWSE-1

Operating manifold controlled by
SEMI-2/... electrohydraulic controller

Controlling the flow
of the medium
in hydraulic
machines
and devices

- electrical or mechanical control
- medium: oil, oil-in-water emulsion
 - intrinsically safe device
 - nominal diameter DN 10

RWSE-1

Operating manifold controlled
by SEMI-2/... electrohydraulic controller

TECHNICAL DATA

✓ Hydraulic parameters	hydraulic oil, oil-in-water emulsion
- working medium	32 MPa
- nominal pressure P_n	35 MPa
- maximum pressure P_{MAX}	2,8 .. 380 mm ² /s
- viscosity range	18 l/min (for oil-in-water emulsion)
- flow rate Kv (according to DIN IEC 534)	25/40 µm
- required / recommended filtration	
✓ Electrical parameters	
- supply voltage U_n	12 ± 15% VDC
- current consumption I_n	110 mA with 12 V DC supply
- admissible input voltage U_i	14,1 V DC
- admissible input current I_i	1,6 A
✓ Working conditions	
- ambient temperature	+5°C ÷ +60°C
- temperature of the medium	+0°C ÷ +70°C
- relative humidity of air	up to 95%
- working position	any
- working time	unlimited
✓ Mechanical parameters	
- size	42x100x191,5 mm
- weight	6,5 kg
- casing protection degree	IP 54

Anti-explosion structure
